

Claim Support

Paperless Environment

Because a rapid response is critical in claim support, new mechanisms are being implemented to help reduce some of the time delays. One such method is referred to as a Paperless Environment.

In today's electronic world, documents can be efficiently scanned and either sent via email or retrieved from an on-line document vault that is password protected. This electronic storage and transfer of documents mitigates postage delays.

Instant document transfer and seamless communication can mean the difference between responding today and waiting until next week.

One of the biggest challenges facing insurance adjusters today is finding the right answers and finding them quickly. We can help.

Apollo BBC leverages our forensic building diagnostic expertise to excel in cause and origin analysis. Our integrated, multidisciplinary approach lends itself well to the challenges of insurance claim support.

Whether the loss involves windows, walls and roofs, mechanical or structural systems, our expertise allows us to evaluate an extensive range of challenging problems.

Cause and Origin
Catastrophic Loss
Repair Cost Analysis
Rapid Response
Subrogation Support
Paperless Environment

We are uniquely positioned to excel in the claim support arena, whether supporting major carriers, owners or independent adjuster, large or small scale.

Our focus is to join your team and make a difference. We emphasize service and recognize that a rapid response is critical in the insurance industry. We pride ourselves on our ability to communicate our findings and assist with any repair.
